

Appendix A: List of NPIAS Airports with 5-Year Forecast Activity and Development Estimate

EXPLANATION OF TERMS AND ABBREVIATIONS USED IN APPENDIX A

City	The city generally associated with the airport.
Airport	The official name of the airport or designated abbreviation.
LocID	The unique airport location identifier for an airport.
Ownership	Indicates airport ownership: PU Public PR Private M Military (Army, Navy, Coast Guard) NA Native American
Hub	The term “hub” is used by FAA to identify very busy commercial service airports, as measured by passenger enplanements. Primary commercial service airports are grouped into four categories. Large hubs are those airports that each account for at least one percent of total U.S. passenger enplanements; medium hubs for between 0.25 percent and one percent; small hubs for between 0.05 percent and 0.25 percent; and nonhubs for less than 0.05 percent of all enplanements, but more than 10,000 annual enplanements. L Large Hub M Medium Hub S Small Hub N Nonhub
Asset Role	Facilities serving mostly general aviation operations were placed in categories based on current activity measures (e.g., number and type of based aircraft and volume and type of flights). There are four categories: National Regional Local Basic Airports that could not be placed into one of the four categories are referred to as “Unclassified.” Adjustments to the Asset Role for “Unclassified” airports reflect data received by FAA through September 2, 2014.

Service Level There are four statutory airport service levels, which describes the type of service the airport currently provides to the community and is anticipated to provide at the end of the 5-year planning period. The service levels also represent funding categories for the distribution of Federal aid. Service Levels shown in Appendix A reflect the FY 2014 activity.

- P Commercial Service – Primary
- CS Commercial Service – Nonprimary
- R Reliever Airport
- GA General Aviation Airport

New airports planned to open beyond the 5-year period are not shown in Appendix A; however, any 5-year costs associated with the development of these airports are included in Table 8 and Table 9.

Enplaned The number of revenue passengers that boarded aircraft at the airport during CY 2012 (FY 2014).

Based Aircraft The number of aircraft hangared or based at the airport. Included in these counts are single engine, multiengine, jets, and helicopters as reported by the airport and verified by the N number registry. Not included in these totals are military aircraft, ultra-lights, gliders, and balloons.

Dev Estimate The 5-year estimate of airport improvements that are eligible for Federal development grants under the AIP.

Note that costs associated with planning (master plans, regional and State system plans, and environmental studies) are not captured in the total. For the 5-year period covered by this report, planning costs total \$364 million.

SASP State Aviation System Plan. This term is used in the State Summary table.

Note: The development presented in these tables was largely compiled in 2013 with adjustments through February 2014.
